MANUEL PALENQUE — LIVE A/V

Electronic Press Kit & Technical Rider

Buenos Aires · `contact@manuelpalenque.info` · mpalenque.github.io · mpalenque.github.io/epk

1. OVERVIEW

FIELD	SPECIFICATION
Artist	Manuel Palenque
Format	Live A/V Performance (*Colapso* / Real-Time Audiovisual Set)
Duration	45–60 minutes
Discipline	Real-Time Generative Visuals · Electronic Music · Synchronized Stage Lighting
Performers	1–2 on stage
Setup / Line Check	30–45 minutes

2. ARTISTIC STATEMENT

An audiovisual performance exploring the concept of collapse through a digital environment interacting with sound.

Set of music and image generated in real time. Both systems communicate and respond to each other. Sound transforms the visual landscape generated. As time passes, the visual system starts to collapse and take over control, destroying any balance on the harmonic structures established. The main theme explored is the balance between the progress of human creation, and destructive patterns as unavoidable forces of entropy. The impossibility of abstraction to overcome nature as time passes.

This is a real-time audiovisual performance where music dynamically drives both the visuals and interactive lighting. The system seamlessly adapts to any screen format or projection, requiring only sound system and screen/projection. If a lighting system is available, it can also be integrated for full control.

3. BIOGRAPHY

Short Bio (100 Words)

Manuel Palenque is a visual artist and creative technologist based in Buenos Aires with over 15 years of experience in real-time audiovisual performance and interactive installations. His work connects electronic music, generative visual systems, and spatial lighting—creating live environments where sound and image are generated together and respond to each other. He has performed and taught at

MUTEK Buenos Aires, Tecnópolis, NODE Festival (Berlin), Beyond Code #2 and TECH LAB PAAK (Tokyo), the School of Creative Media (Hong Kong), and Bright Moments (Venice). He runs Dataraiz, a media lab in Buenos Aires, and founded the Black Cycle art and technology festival at ArtHaus.

Extended Bio (200 Words)

Manuel Palenque (b. 1986, Buenos Aires; Electronic Arts, UNTREF) is a visual artist, electronic musician, and creative technologist specializing in real-time audiovisual systems and interactive installations. Over the past 15 years, his practice has focused on live performance environments where electronic sound, GPU-driven visuals, and physical lighting operate as a single instrument.

His performances and installations have been presented internationally at MUTEK Buenos Aires, Tecnópolis, Bright Moments Venezia (Venice), Beyond Code #2 / SuperDeluxe (Tokyo), the School of Creative Media at CityU (Hong Kong), NODE Forum for Digital Arts (Berlin), and Telenoika (Barcelona). Previously Technical Video Director for the international theatrical company Fuerza Bruta and currently Senior Creative Technologist at Superside, he brings large-scale stage direction together with custom real-time software engineering. In Buenos Aires, he directs Dataraiz (`dataraiz.io`), a media lab for art, science, and technology, and founded Black Cycle (`ciclonegro.dataraiz.io`), a 12-hour festival of live audiovisual performance, interactive installations, and critical talks at ArtHaus.

---

4. SELECTED WORKS & PERFORMANCES

- Colapso (Live A/V) — Real-time audiovisual performance exploring digital collapse and entropy through particle systems and electronic sound. Presented across a 30-show run at Tecnópolis (Buenos Aires).
- Black Cycle / ArtHaus — Founder, curator, and live A/V performer for a 12-hour art and technology festival in Buenos Aires combining live A/V sets, interactive installations, and workshops.
- Bright Moments (Venezia & Worldwide) — Site-specific installation inside a Renaissance church in Venice combining real-time fluid simulation, responsive lighting, physical water on the floor, and generative sound; global direction of live digital art events.
- Verano Tecnópolis — Large-scale motion-tracked interactive installations linking lights, lasers, projections, and LED screens to audience movement in real time.
- Buenos Aires Planetarium (FullDome) — 360° real-time generative visuals and spatial sound for fulldome projection.
- International Performances & Teaching — MUTEK Buenos Aires · Beyond Code #2 (Tokyo) · School of Creative Media (Hong Kong) · NODE Festival (Berlin) · TECH LAB PAAK (Tokyo).

6. TECHNICAL RIDER

On Stage (Provided by Artist)

- Self-contained real-time visual and audio workstation (vvvv / TouchDesigner / Ableton Live).
- Hardware MIDI / OSC controllers for live parameter modulation.
- Professional balanced audio interface (Stereo L/R + Sub output).
- USB-to-DMX / Art-Net interface for real-time stage lighting synchronization.

Video & Darkness (Provided by Venue)

- **Display:** Scalable to custom LED walls, large-scale projection, fulldome, and non-standard aspect ratios.
- **Specification:** LED wall (minimum 1,200 nits) or high-contrast projection (1080p or 4K, minimum 300 nits surface luminance, 10,000:1 native contrast).
- **Signal:** Direct HDMI or SDI line from the stage performance position to the primary display processor.
- **Darkness:** Total or near-total darkness with minimal ambient light spill. The piece relies on true blacks.

Audio (Provided by Venue)

- **PA System:** Professional full-range stereo PA system with high-headroom subwoofers capable of clean, undistorted low-frequency reproduction.
- **Inputs:** 2× active balanced DI boxes (XLR) at the performance table for Stereo L/R (plus 1× optional auxiliary channel for dedicated Sub).
- **Monitoring:** 2× full-range stage wedges or stereo IEM feed at the performance position.

Lighting & Stage (Provided by Venue)

- **Lighting (Optional / Recommended):** 1× 5-pin DMX line (Universe 1) or Art-Net RJ45 drop at the performance table, patched to house wash, strobes, and haze machine.
- **Stage Station:** Sturdy table at performance position (approx. `1.5m × 0.8m`, height `80–90cm`), facing the screen, with stabilized AC power (`4×` outlets).
